Will Sweden build new nuclear?

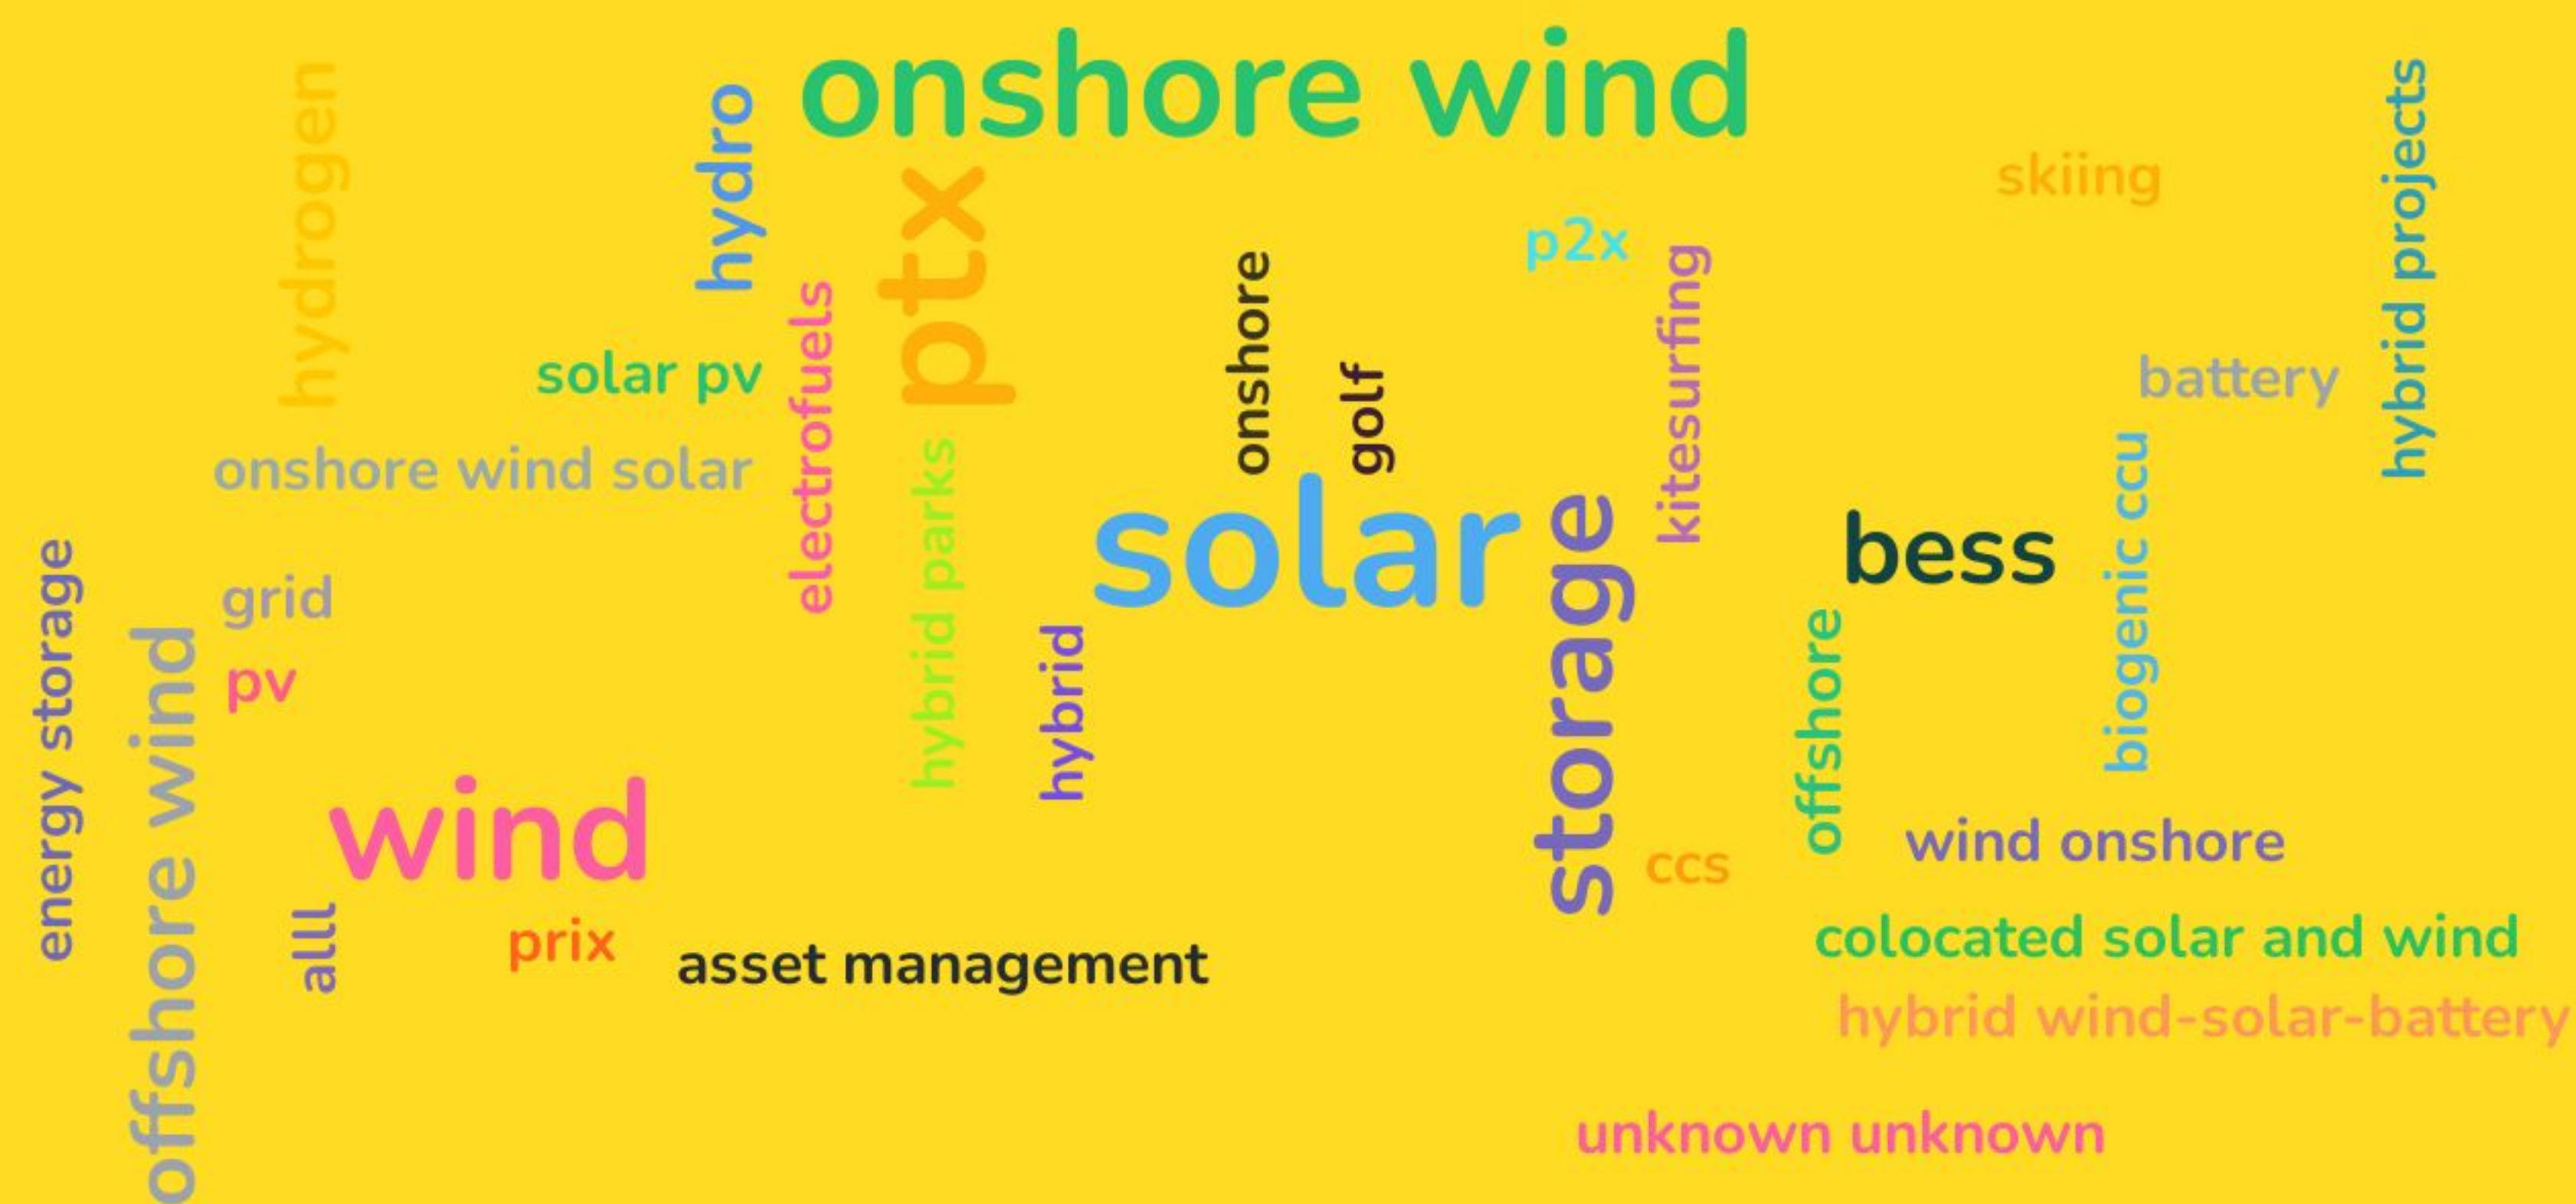

Do you plan to construct/invest in battery storage next 1-5 years?

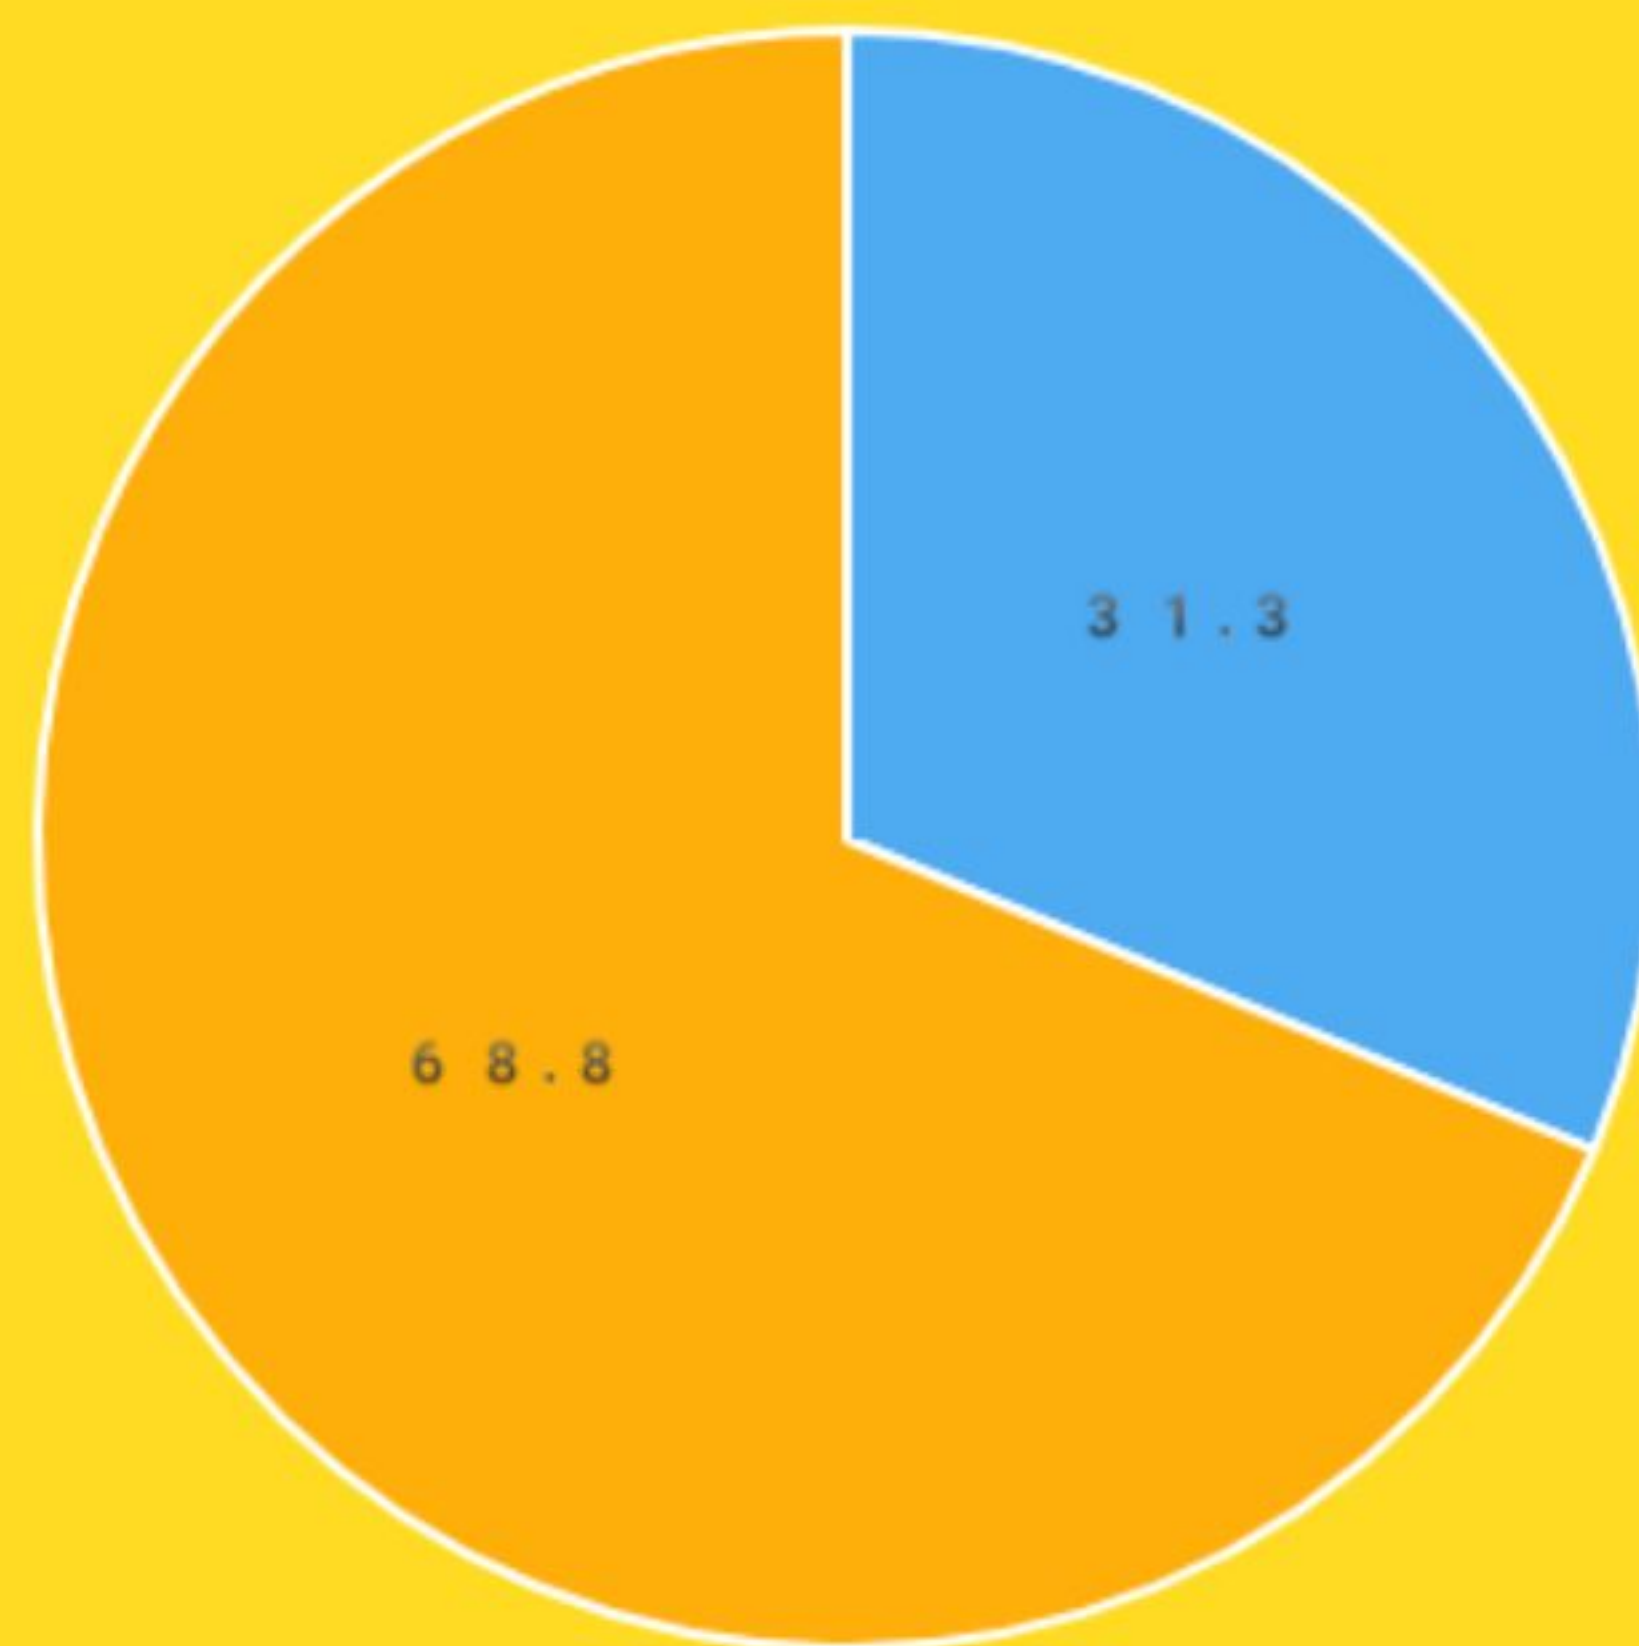

Batteries: When are revenue streams from energy arbitrage larger than from ancillary services?

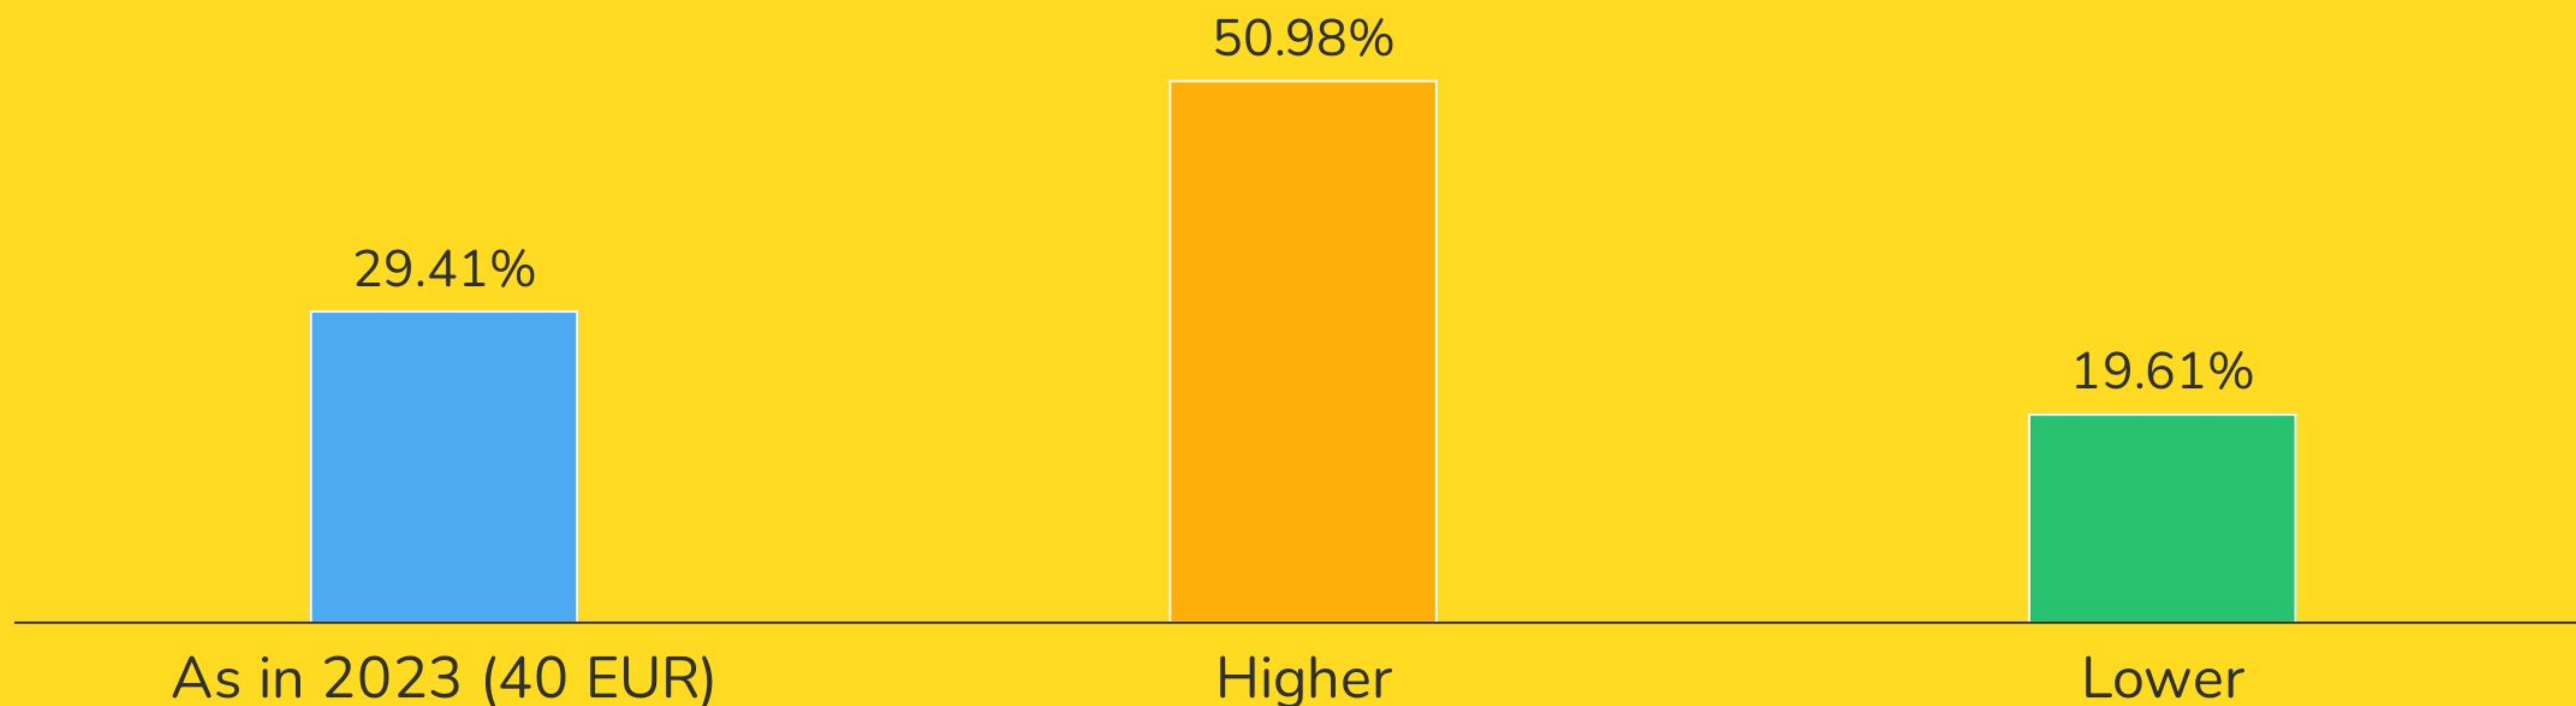

In 5-10 years: In which areas will you be most active in? (Ex. solar, on/offshore wind, storage, PtX, SMR, CCS, grid, other...)

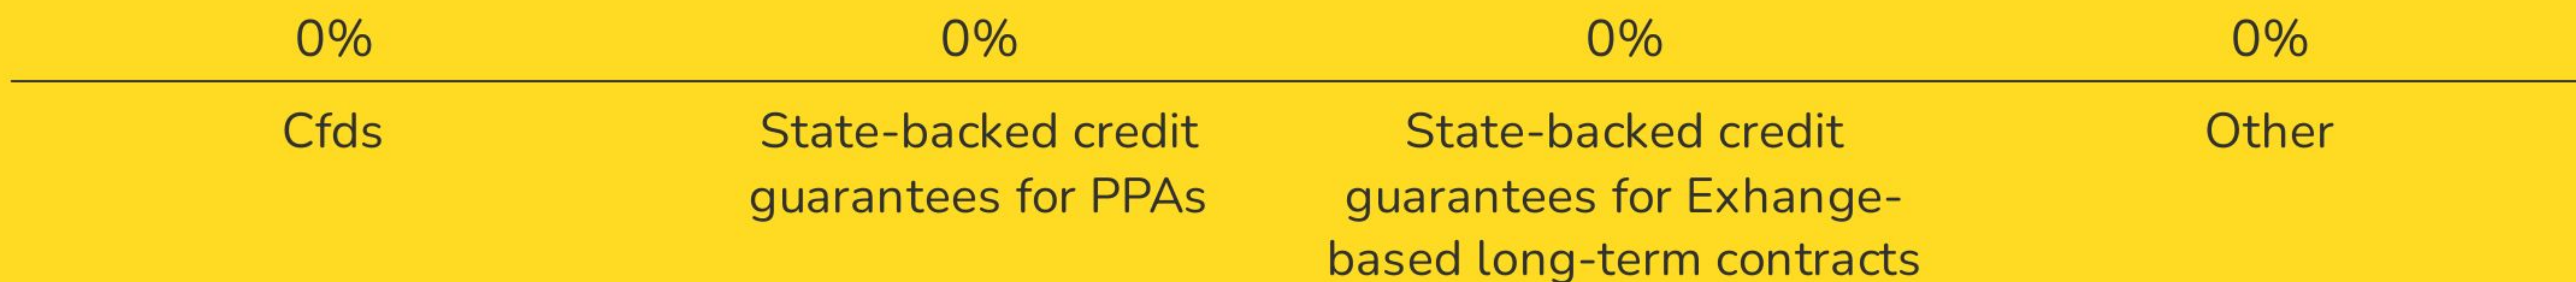

Will Germany introduce bidding zones (north/south)?

What will the power price in SE1 be in 2040?

Which measures would best support new renewable production and industry investments by increasing long-term hedging possibilities?

Anything that would stop/pause your willingness to invest/develop projects in the Nordics?

Which presentations/topics would you like us to cover in a next webinar/seminar?
