Ilmatar submits EIA for large-scale solar project in Sweden

Finnish renewable energy company Ilmatar Energy Oy said on Tuesday that it has finalised the environmental impact assessment (EIA) for a 550-hectare (1,359 acres) solar farm it seeks to build in Sweden.

The proposed solar farm, set to be located in Olivehult in Motala municipality, stands to become the largest such facility in Sweden and one of the largest in Europe, according to Ilmatar.

It took the company one and a half years to complete consultation and all investigations under the EIA process. The application for environmental approval has been sent to the County Administrative Board in Östergötland.

Olivehult, - 550 ha

Key data

Project name and municipality	Olivehult, Motala
Coordinates	58° 36' 33.0084" N 15° 16' 1.4232" E, WGS84
Secured land	550 hectares
Installed capacity	495 MWp
Battery size	100 MWp
Environmental permit applied (kap. 9)	26-03-2024
RTB	30-09-2025
COD	30-09-2028

An aerial photograph showing a vast solar farm with rows of photovoltaic panels installed in a grassy field. In the background, there is a dense forest, a small body of water, and some industrial or construction sites under a clear blue sky.

The largest park
in Sweden?

A photograph showing a flock of white sheep grazing in a lush green field. In the background, there is a large array of solar panels mounted on a metal frame. The sky is blue with scattered white clouds. A semi-transparent text box is overlaid on the image.

For sure, Sweden's
sheepest park!
